

## General Session Descriptions

### Centerpointe Overview:

What's new in Student Management? Let's look at Pearson School systems' centralized web-based solution that delivers more than you'd ever expect from a Student Information System

### Colorado Department of Education - What's New and Challenging in State Reporting:

### Dazzle Your Data with Excel:

Explore ways to take data analysis much further! We'll begin with some query basics, then take that data from your SIS into Microsoft Excel, where we can format, sort, filter, and generate impressive pivot tables and charts. High tech skills are not required to create attractive reports!

*Infinite Campus Overview:* Your opportunity to check out Infinite Campus, a complete information management solution tailored to the needs of local school districts, regional consortia and state departments of education.

*Power School Overview:* Your opportunity to check out Power School, a web-based student information system (SIS) from Apple, simplifies data-driven decision making by providing real-time information to all stakeholders — over the Internet.

## Vendor Descriptions

**Computer Information Concepts** - Computer Information Concepts, Inc. (CIC) has assisted Colorado school districts for over 24 years with implementing and supporting student information systems. CIC provides sales and Peopleware services - implementation, training / consulting, and technical support, and is the Infinite Campus Channel Partner for Colorado and several nearby states.

**Discovery Software** - Discovery's product development experience includes reMark! Gradebook and Principalm, which gives school administrators access to all their students' data from a Palm OS device. We have experience working with consulting customers on their products, for example ground-up development of a high-security, cross-platform gradebook product. As well, we have a handful of other products at various stages of development internally. Naturally as we launch products they will be posted on our website, so keep an eye out for updates.

**EduLink Systems** - EduLink Systems offers complete web and telephone base Parent Communications Systems and ASP Services that integrate with SASIxp. Improve attendance and involve parents!

**Infinite Campus** - Infinite Campus is a complete information management solution tailored to the needs of local school districts, regional consortia and state departments of education. Throughout the United States, a significant and growing number of educators, parents and students benefit every day from our unique combination of educational experience and technical expertise.

**Lifetouch** - Lifetouch provides school portraits along with many technical products for administrative and security use. In doing so, we capture the spirit of today and preserve memories for tomorrow.

**MCP Corp** - MPC Computers (MPC), formerly known as Micron PC, is one of the top ten PC companies in the U.S. market. MPC's mission is to deliver high quality PCs with software and services to create complete computing solutions. MPC concentrates specifically on the government, education and mid-size enterprise markets. With this focused approach, MPC aligns virtually every aspect of its business to better serve its customers' IT needs.

**Midwest Educational Group** - Midwest Educational Group provides software solutions that integrate with school's student systems, including: Activities Eligibility Reporting, Fees Reporting, On-line Course Requests, PDA Student data, Attendance Letters, Student Alerts, and more.

**Pearson School Systems** - Pearson School Systems (PSS) is dedicated to helping educators improve student performance by combining the power of student information, assessment, reporting and business solutions.

**PowerSchool** - PowerSchool, a web-based student information system (SIS) from Apple, simplifies data-driven decision making by providing real-time information to all stakeholders — over the Internet. Administrators get the most accurate information to make more effective decisions. Teachers gain timesaving administrative tools, parents gain immediate access to their children's grades, and students can track their own progress.
