Executive Session Results

Update on conference

Von has 6 PCs for Bull Pen – need at hotel on Sunday at 5:00

Apple is sending 12 laptops or notebooks – they may not be here until Friday

Final schedule will be posted on the web sight by Tuesday morning

Will post Lunch menu on the web

Districts were reminded of the lost registrations. It was asked that each district representative do their best to verify all their district registrations have been received. All confirmations have been sent out.

3 confirmed vendors

Bag stuffing Jan 26th – Conifer room at the hotel 10:00-12:00 RSVP to Jim at for lunch

Most of the presenters have sent in the Blurbs

Steve Bohlander has agreed to provide a 6.0 CD to load on the bullpen machines Sunday evening.

Nametags PDL will provide 3x5 landscape

Presentation by Steve Bolander of CMS Assessment Wizard – imports test data into SASIxp Extended test history

Presentation by Mark Richardson of Concert Inform – will be presented at the conference, and PowerPoint will be posted on the Web

Some Items from District Sharing

Boulder – How do district do the no middle name? Do you have to remind users to 2 fields? One district uses a ~

Adams 14 – service release 4 cured the days of activity tab. Moved a sequel server and can not use the auto com to start taskserver

Adams 12 – getting ready to do New Year roll. Questions about SASID. Running smoothly. Just got the ACT information in.

CSDB – Using Score Analyzer happy with it.

Falcon – Have not had any major problem. Using Jenterprise server schools like the withdraw form

Jeffco – Will start New Year Roll over. Training all registrars on the Ritz site the will have view only. Will complain about the October and December submission being different format.

Thompson – Spent since end of October setting up and rolling out Parent Connect. Very happy with it. Looking at Elementary report card solutions. Doing New Year roll the 24 & 25. All new Macs coming in are OS10. Will be going to Ver 6.0 over the summer. PC Win98 does work Win95 is unknown.

Mapleton – Going smooth. Ready to do New Year Roll over. 5.5.3 Attendance was breaking down the lists. May be the instructional setting field. Wants to use IGPro in Elementaries for report cards. Must keep teachers from adding students. Admin.exe will lock tasks for teachers.

Littleton – Has been working on data warehouse. Would like to get AP tests electronically. File does not have ID. Carrie Sullivan is now working with Sue, Jeremy is no longer SASI support he is working with a district warehouse project. Doing New Year roll next week. CSAP labels were approved on Friday. Some middle schools have print to mail and had problems with report cards.

Aurora – 5.5.5 Did the CSAP Label last week. New Year Roll is scheduled for right before the conference. Have a position opening up, will be posted in the next week or so. Jamie has resigned

Denver – 5.510 December of 2004 SASIxp 5.5 will no longer be supported. Would like to know when the next release is coming out and what it will be. Has done first New Year roll in less than 2 days. 11-13 February will host PDL report writer training. Will put something out on the list server. Open to other districts. 11 open spots. Asked what MAC OS have they tested with IGPro? DPS has used all. They work if not using NOVEL with NOVEL must turn on Apple talk. Still migrating to Windows Servers. Ability to remote in has made it worth it.

Windsor – Did New Year roll over Christmas went well. Replaced _ of the teacher machines with new machines, very happy.

Douglas – Took a week off at Christmas. Second week did 6.0 install and New Year Rollover. Went very well. 80% MAC 8.6OS does not work well with SASI 6.0. On OS 9 cannot print screen or expanded window. Both issues are SARs. DIS04 report cannot report 3 characters Disp codes. Upgraded from 5.5. Using In Touch Reports for CSAP Labels. Did the labels with 6.0 worked well. Over all likes 6.0 not a lot of changes. There is a File Def change. SASI run very well in MAC OS 10
